Step-By-Step guide on How to Contact FLIR Enterprise Security Support:

FLIR Enterprise Security users can contact us either via Phones or submitting a request via our customer support portal : https://support.flir.com

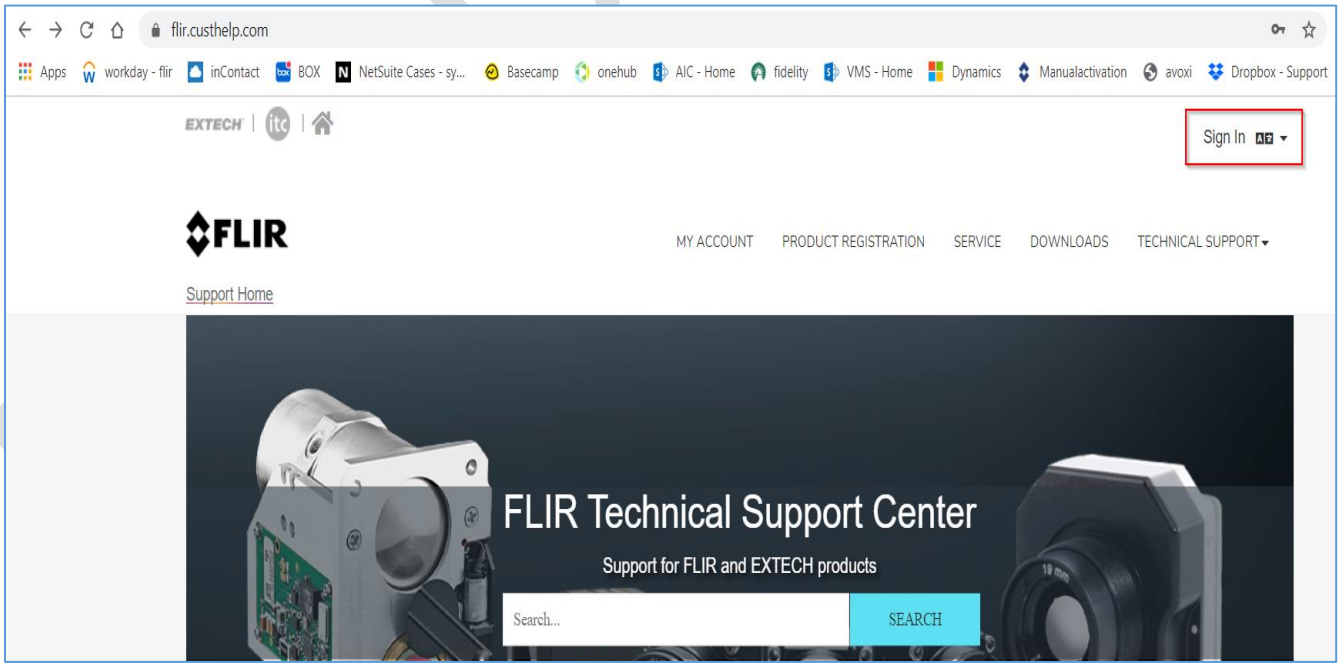

1. Contacting Support via Customer Support Portal

Enterprise Security technical support is moving to a new ticketing platform. The new platform will help us to better serve our customers by giving them ability to create their own support tickets amongst other things. You may access the new platform by registering and logging into our website https://support.flir.com

a. Register to Customer Support Portal

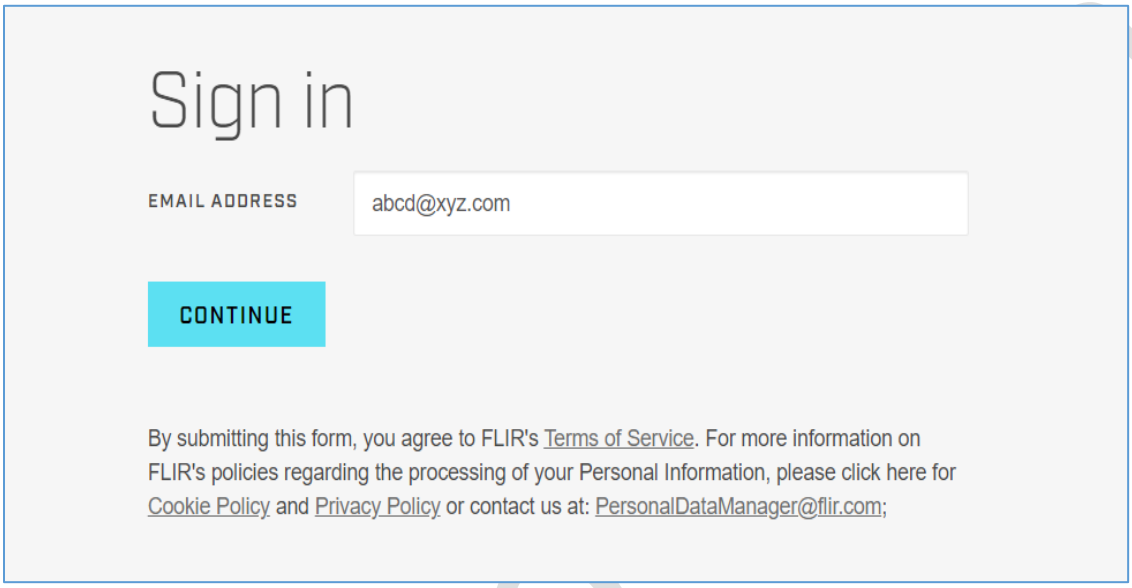

i. New users must perform a one-time registration. Users need to register themselves to https://support.flir.com.

ii. Click on “Sign In” option on top right corner.

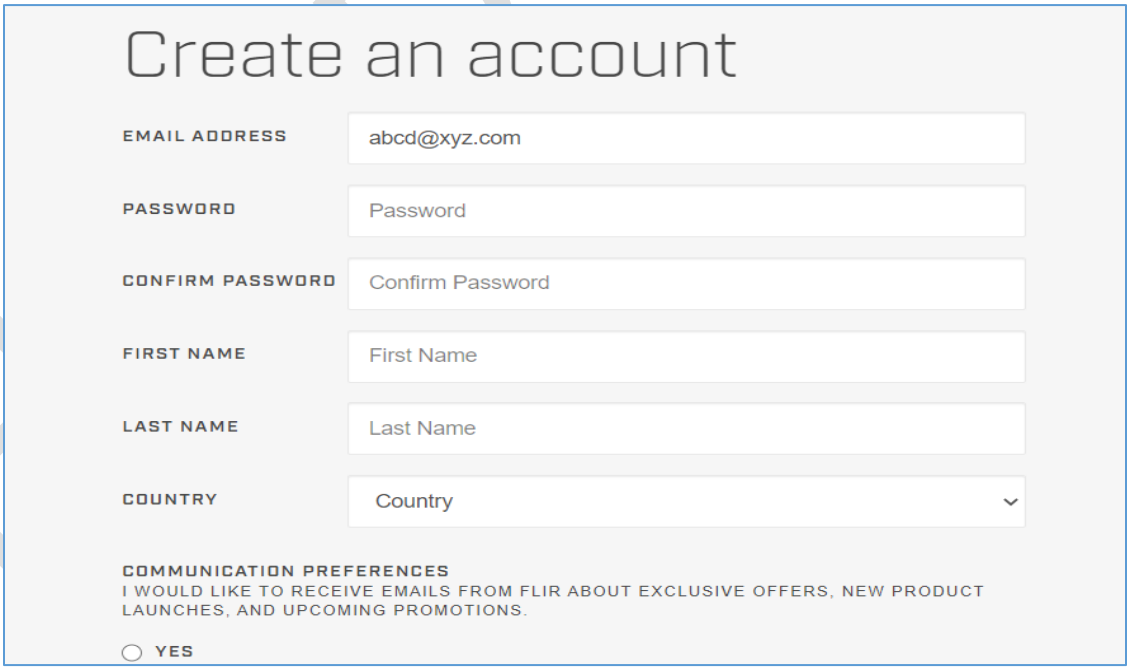

For further information or clarification on content within this document, please contact your local FLIR Tech Support Center.
Proprietary – Company Confidential
This document does not contain any export-controlled information.

iii. Please enter your email address to register. Official email address is preferred so that the system can recognize you if you have interacted with Enterprise Support in the past.

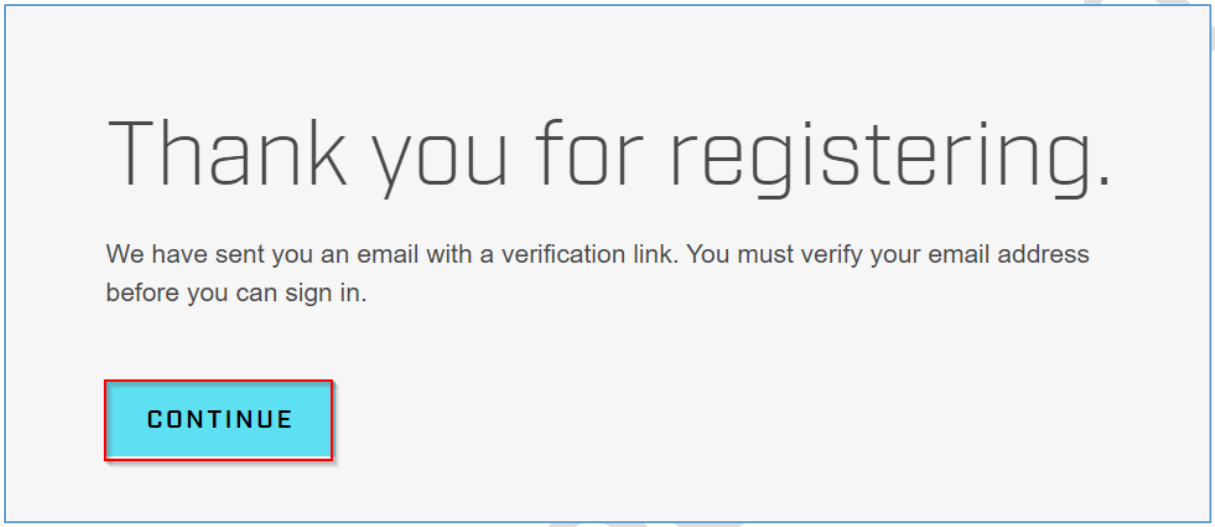

iv. Fill the Registration Form. All the fields in the form are required. Press “Continue” after filling the information.

For further information or clarification on content within this document, please contact your local FLIR Tech Support Center.
Proprietary – Company Confidential
This document does not contain any export-controlled information.

v. You will then receive a confirmation email on your registered email address with a link to authenticate your email account. Please click on that link to Activate your account.

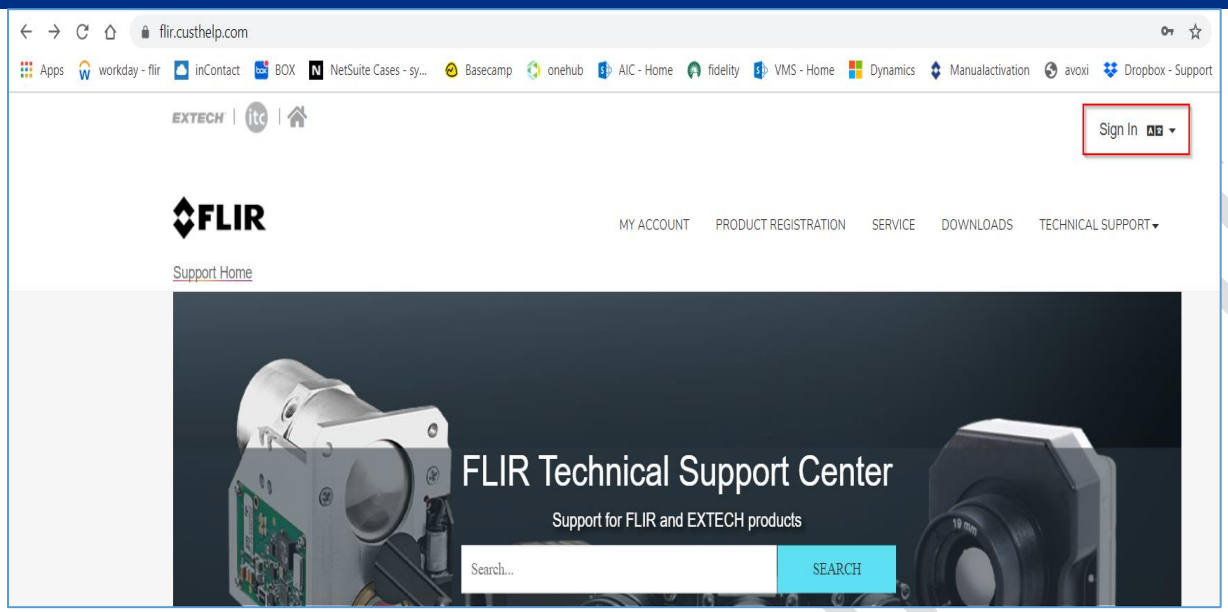

b. Creating / Updating a Support Request

i. After successful registration, users can contact support by logging into our website https://support.flir.com

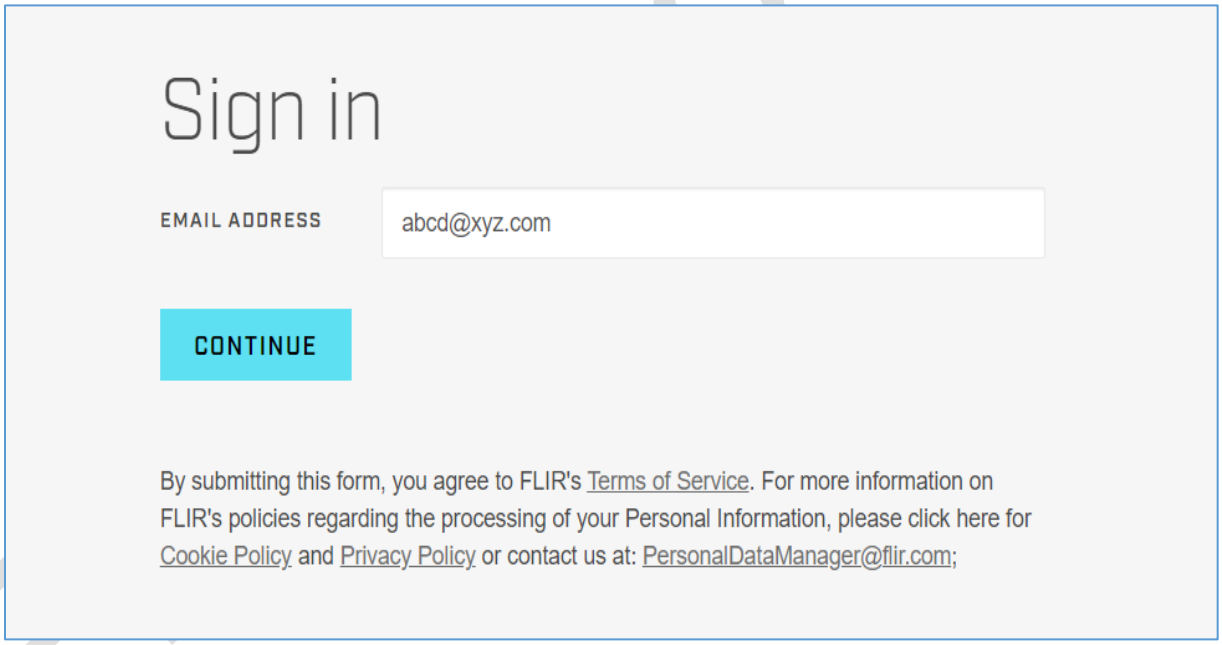

ii. Click on “Sign In” option on top right corner.
